

Fast construction for rapid occupancy and lower interim financing costs.

Picture this...Then have your authorized Stockade Builder build it for you.

Low, low maintenance requirements.

Stockade Builders have the ability to offer total construction services: project budgeting, site work, foundations, building erection, interior finishing, mechanical and electrical work and even landscaping!

THE STOCKADE SYSTEM

Stockade's buildings are individually designed and engineered with broad flexibility in mind—so you get exactly the building you require, with the foremost combination of appearance, function and value.

Computer-aided designs provide total system reliability and top economy for your building's unique requirements. Best of all, your Stockade building will be built by a highly qualified, local contractor—your Stockade Builder.

Your authorized Stockade Builder is your community's total building expert. They can help you with everything from site selection, to financing, to interior design. However, even the best engineering and materials should be backed with a written warranty specifying what your builder will do if something does go wrong. Your Stockade building is backed by the most comprehensive, written warranty in the industry today. This warranty covers your building on everything from its structural capabilities to the durability of the finished paint system.

COMMERCIAL & INDUSTRIAL PRE-ENGINEERED SYSTEMS

STOCKADE BUILDINGS

“Building For The Future”

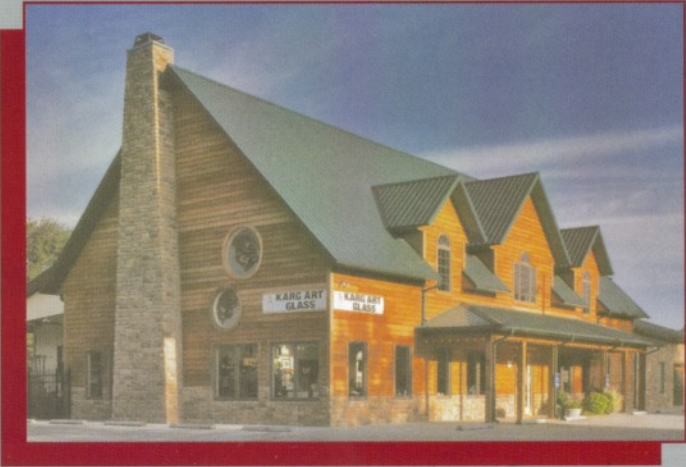

COMMERCIAL

FLUSH FRAME SYSTEM

Stockade's Flush Frame Structural System is designed for the commercial market. However, this System has evolved into broad usage in all market applications. This System combines the advantages of the structural, flush frame wall system with exceptional thermal capabilities for maximum energy conservation.

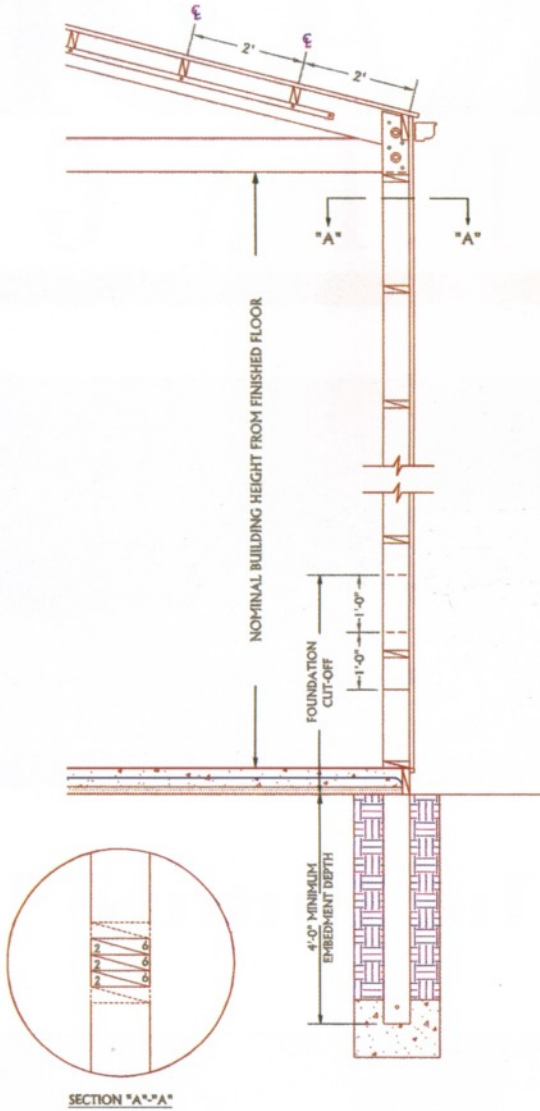

▲ Custom architectural design flexibility to blend into the local community.

▲ Stockade products are carefully manufactured, rigorously tested, inspected and dependably delivered.

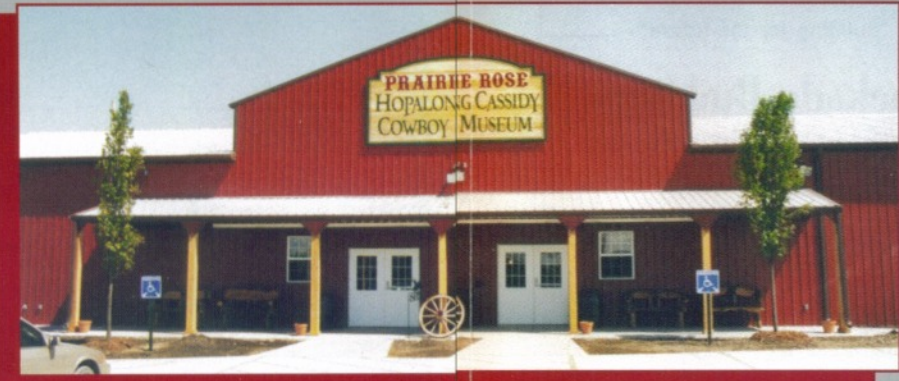

▲ Beauty and durability with structural integrity.

Of special interest to owners, architects and engineers, the Flush Frame System allows for "flush" wall finishes providing maximum, unobstructed space around the interior perimeter of the building.

▲ Pre-engineered to produce the ultimate in structural capability and versatility.

▲ Buildings to meet today's tough Design and Code requirements.

▲ Superior energy efficiency for low energy bills.

INDUSTRIAL

STANDARD FRAME SYSTEM

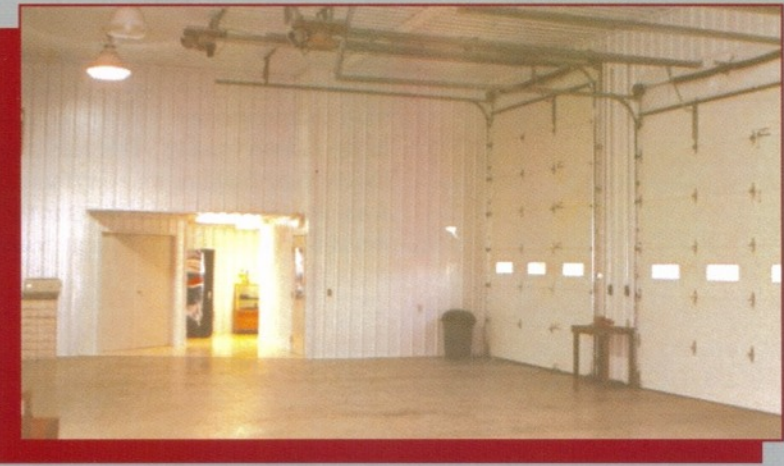

The Stockade Standard Frame Structural System is designed for the industrial market. This versatile System enjoys wide usage in manufacturing complexes, warehouses, recreational facilities and offices, while providing outstanding value combined with great appearance and performance.

▲ Your Stockade Systems Builder can help you decide the best system for your specific building project.

▲ Custom design flexibility with outstanding durability.

▲ Finished inside and out to suit your individual tastes.
